

IN THE CLAIMS

1. (Original) Use of

- a) L-amino acids serine (Ser) and isoleucine (Ile),
- b) trace elements chromium (Cr), tin (Sn), selenium (Se), vanadium (V) and wolfram (W), and
- c) folic acid

for the manufacture of a pharmaceutical composition for treating or preventing psoriasis.

2. (Original) The use according to claim 1, for the manufacture of a pharmaceutical composition further comprising zinc (Zn).

3. (Currently Amended) The use according to claim 1 [[or 2]], for the manufacture of a pharmaceutical composition further comprising manganese (Mn).

4. (Original) The use according to claim 1, for the manufacture of a pharmaceutical composition comprising:

- a) 2 - 5 g of each of L-serine and L-isoleucine,
- b) 0.5 - 6 mg of each of chromium (Cr), tin (Sn), selenium (Se), vanadium (V) and wolfram (W) salts, and
- c) 1 - 2 mg of folic acid.

5. (Currently Amended) The use according to ~~any of the previous claims~~ claim 1, for the manufacture of a pharmaceutical composition further comprising neurogenic lipids.

6. (Currently Amended) The use according to ~~any of the claims~~ claim1 [[- 4]], for the manufacture of the composition in powder form.

7. (Currently Amended) The use according to claim 5 [[of 6]], for the manufacture of a dietary supplementation composition.

8. (Original) A pharmaceutical composition comprising as sole pharmaceutically active ingredients:

- a) L-amino acids serine (Ser) and isoleucine (Ile),
- b) trace elements chromium (Cr), tin (Sn), selenium (Se), vanadium (V) and wolfram (W), and optionally zink (Zn), and
- c) folic acid.

9. (Original) The pharmaceutical composition according to claim 8, comprising as sole pharmaceutically active ingredients:

- a) serine (Ser) and isoleucine (Ile),
- b) chromium (Cr), tin (Sn), selenium (Se), vanadium (V) wolfram (W) and zinc (Zn) salts, and
- c) folic acid.

10. (Original) Method of treating or preventing psoriasis, wherein pharmaceutically active amounts of:

- a) L-amino acids serine (Ser) and isoleucine (Ile),
- b) trace elements chromium (Cr), tin (Sn), selenium (Se), vanadium (V) wolfram (W), and optionally zinc (Zn), and
- c) folic acid

are administered to a subject in need thereof.
